ECB,Dhaka, Bangladesh

PROFESSIONAL SUMMARY

Software Quality Assurance (SQA) professional with hands-on experience in manual and automation testing, requirement analysis, test case design, defect reporting, regression testing, and quality validation. Experienced in performing functional, UI, validation, negative, and end-to-end testing, with practical exposure to Cypress and Selenium for test automation. Skilled in analyzing software requirements, identifying and documenting defects, executing structured test scenarios, verifying fixes, and ensuring reliable application behavior. Backed by a technical foundation in programming, SQL, web technologies, and software development, with a strong interest in building high-quality, user-focused, and dependable software products.

TECHNICAL SKILLS

Software Testing: Manual Testing, Functional Testing, UI Testing, Regression Testing, End-to-End Testing
API Testing & Automation: REST API Testing, Newman,API Authentication Testing
QA Practices: Test Case Design, Requirement Analysis, Defect Reporting, Bug Tracking, Test Execution, QA Documentation
Automation & Testing Tools: Cypress, Selenium, Jira, Trello
Programming & Scripting: Python, JavaScript, TypeScript, Java, C
Database & Backend: SQL, MySQL, FastAPI, REST APIs
Web Technologies: HTML, CSS, JavaScript, PHP, WordPress
QA & Collaboration Tools: Postman, Jira, Trello, Git, Google Colab, Jupyter Notebook, MS Excel

PROFESSIONAL EXPERIENCE

Data Analyst – Data Engineer Team **July 2026 – Present**
Rooya Bangladesh

- Review and validate image and text annotations according to project-specific guidelines to maintain dataset accuracy, consistency, and overall quality.
- Used Python (Pandas, NumPy) and Excel for data cleaning, analysis, automation, and preparing analytical reports.
- Used SQL to extract, filter, join, and analyze data from databases for reporting and decision-making.
- Built interactive Power BI dashboards and reports to visualize KPIs, trends, and business performance.

QA Engineer – Quality Assurance Team **May 2026 – July 2026**
Dream71 Bangladesh Limited

- Performed manual and automated testing for web-based applications, including functional, regression, smoke, and usability testing to ensure product quality.
- Developed and maintained automated test scripts using Playwright with TypeScript, covering critical user flows and reducing repetitive manual testing efforts.
- Executed test cases, documented actual results, updated QA status, and maintained structured testing records using the company's test-case tracking format.
- Conducted API testing using Postman and participated in requirement analysis, test case preparation, execution, and regression testing before production releases.

Intern – In-House Software Development Team **December 2024 – February 2025**
IT Division, Trust Bank PLC

- Worked with WordPress and PHP to develop and customize website functionality, gaining practical understanding of web application behavior and software development workflows.
- Supported development of banking-service and customer-support features while gaining hands-on exposure to front-end and backend application components.

EDUCATION

B.Sc. in Information and Communication Engineering **2025**
Bangladesh University of Professionals, Dhaka
CGPA: 3.59 / 4.00

Higher Secondary Certificate (HSC) **2020**
BAF Shaheen College, Paharkanchanpur
Science — GPA: 5.00 / 5.00

Secondary School Certificate (SSC) **2018**
BAF Shaheen School, Paharkanchanpur
Science — GPA: 5.00 / 5.00

PROJECTS

VerifyREST – REST API Automation Framework

- Built an end-to-end REST API automation framework using Postman, JavaScript, Newman, and npm, covering authentication and complete CRUD workflows with dynamic runtime variables.
- Automated 8 API requests with 42 assertions covering response validation, data integrity, update behavior, deletion verification, and response-time checks, achieving 0 failures in validated runs.
- Integrated the test suite with GitHub Actions CI and automated HTML reporting, with secure credential management using repository secrets.
- github.com/Rafi7078/verifyrest-automation-framework

E-Commerce Playwright Automation Framework

- Built an end-to-end E-Commerce UI Automation Framework using Playwright, TypeScript, and Page Object Model (POM), covering login, product search, cart, checkout, payment, and successful order placement.
- Automated 8 critical test scenarios with stable locator strategies, reusable page objects, environment-based credentials, and condition-based waits; achieved 8/8 passing tests in final execution.
- Improved test reliability by handling dynamic cart modals, duplicate elements, strict locator conflicts, navigation timing issues, and flaky public-site behavior.
- github.com/Rafi7078/ecommerce-playwright-automation

End-to-End Web Application Testing – Cypress

- Implemented end-to-end (E2E) tests for a web application using Cypress to validate multiple user login scenarios and expected application behavior.
- Tested positive, negative, and edge-case scenarios including valid and invalid username/password combinations to identify potential authentication and validation issues.
- Applied automated test execution to verify application functionality and improve repeatability of common testing scenarios.
- github.com/Rafi7078/End-to-End-Testing-with-Cypress

PeopleMind AI – AI-Powered HR Intelligence Assistant

- Developed a full-stack HR application using FastAPI, React, TypeScript, SQLite, ChromaDB, Ollama, and Gemini Embeddings, providing practical exposure to testing complex frontend, backend, database, and AI-integrated application workflows.
- Implemented automated backend testing while developing a RAG-based document intelligence pipeline involving PDF processing, semantic search, vector storage, and evidence-grounded responses.
- github.com/Rafi7078/peoplemind-ai

Brain Tumor Detection using AI

- Developed an AI-driven medical imaging system for automated brain tumor detection and localization using deep-learning models and image preprocessing techniques.
- Gained experience working with data-processing and model-driven application workflows where output validation and consistency are important quality considerations.
- github.com/Rafi7078/Human_Brain_Tumor_Detect

CERTIFICATIONS & PROFESSIONAL TRAINING

Microsoft SQL Foundations – Microsoft — Coursera

- Developed foundational knowledge of relational databases and SQL, including SELECT queries, filtering, sorting, JOINs, grouping, and aggregate functions relevant to database validation and data verification.
- Certificate

Excel Essentials for Workplace Productivity – Passport to Earning Bangladesh (UNICEF)

- Developed practical Excel skills involving formulas, PivotTables, charts, data analysis, visualization, and structured reporting.
- Certificate
